

PRESS RELEASE

THE 10-MW WIND FARM IN MAZZARINO, SICILY, GOES INTO OPERATION

- **The Group was responsible for the construction of the wind farm and will directly manage it**
- **The Group's installed capacity increases to 186.2 MW (of which approximately 50% is in Italy)**

Ravenna, 15 January 2024 - The **Tozzi Green Group**, one of Italy's leading renewable energy groups and a world leader in rural electrification, has completed **the construction and commissioning of the onshore wind farm in Mazzarino, Sicily, with a total installed capacity of 10 MW**. The wind farm, consisting of five 2-MW wind turbines, will have an estimated annual output of approximately 24 GWh.

It will supply **renewable electricity to more than 6,000 households, enable total CO2 savings of more than 300,000 tonnes** over its projected 20-year operating life, and make a positive contribution to related employment in the surrounding areas.

Tozzi Green **will directly manage the wind farm**, confirming its uniqueness in being able to **fully and horizontally integrate its entire supply chain (Development, EPC, O&M)** of all renewable energy source (RES) plants: hydroelectric, wind, photovoltaic and biogas.

The new wind farm brings the Group's **installed capacity up to 186.2 MW, of which about 50% is in Italy, and more than 222,000 photovoltaic kits in Peru**.

Andrea Tozzi, CEO of Tozzi Green, stated: *"The commissioning of the Mazzarino wind farm, just a few months after the Murfi and Vicaretto wind farms, is another concrete step in our major investment plan to increase our installed capacity in Italy, that is now around 100 MW.*

We expect to see significant growth in our country, mainly through the completion of the many projects we have developed in house.

I am increasingly confident about the development of renewable energy plants in Italy, reassured by the strong growth in installed capacity reported in 2023 and the growing understanding of the importance of making a large industrial country such as ours more energy independent and competitive."

Tozzi Green

Tozzi Green is one of Italy's leading renewable energy groups and a major global player in rural electrification. The Group has been operating worldwide for over 30 years developing plants for the generation of energy from renewable sources and is the only one that completely and horizontally integrates the entire supply chain (Development, EPC, O&M) for all plants from renewable energy sources (RES): hydroelectric, wind, photovoltaic, and biogas. Consolidated revenues in 2022 amounted to € 109.3 million, EBITDA € 60.2 million, and net profit € 10.3 million. At the end of 2022, the Group owned plants in Italy and worldwide, had qualifying shareholdings for a total capacity of 167.4 MW, and has installed 222,000 photovoltaic power kits.
